

Arjun Kurapati

Poland, Warsaw

Level Design | Technical Game Designer

kurapatiarjun06@gmail.com

PROFILE

Technical Level Designer with a background in 3D art and environment design, focused on creating clear, playable levels that support gameplay and player flow. Experienced in building level blockouts, large-scale environments, and implementing basic gameplay logic using Unreal Engine 5. Previous professional experience as a 3D artist provides a strong understanding of scale, visual readability, and effective collaboration within multidisciplinary teams.

PROJECTS

The Light Remains | Solo Level Design Project

- Designed a complete solo level focused on player flow and pacing within a three-week scope.
- Created level blockouts and implemented core gameplay interactions using Unreal Engine Blueprints.

Sabershot: Jack of All Blades | Team Project (Technical Level Designer)

- Designed large-scale playable levels focused on navigation, combat flow, and spatial readability.
- Implemented level streaming, gameplay triggers, and set dressing to support performance and clarity.

Echoes of Stella | Team Project (Technical Level Designer)

- Designed level layouts and puzzle spaces with a focus on player guidance and pacing.
- Implemented interaction logic and gameplay and triggers using Unreal Engine Blueprints.

Puddle Whispers | Game Jam Project | EduJam, 2 Days (Level Design & Environment Art)

- Designed and implemented level layouts under a tight one-day production timeframe.
- Created and dressed environments to support gameplay readability and overall mood.

Just My Duck | Team Project (Level Designer)

- Designed small-scale level layouts focused on player movement, pacing, and clear progression.
- Iterated on layouts based on playtesting feedback.

Sushi 2 Go | Team Project (VFX Support / Narrative Assistance)

- Contributed minor visual effects and assisted with basic narrative elements.
- Gained initial experience working within a team production environment.

EXPERIENCE

3D Artist at Polycrab (Remote) | 09/2023 – 02/2024

- Created detailed and optimized 3D product assets with consistent modeling and texturing quality.
- Delivered an average of 8–9 assets per week while meeting production timelines.
- Performed asset optimization to balance visual quality and performance.
- Collaborated with the team to align assets with client and production requirements.

EDUCATION & AWARDS

Diploma in Game Design (Specialization: Systems Design) 2024 – 2026 (Ongoing)

- Futuregames, Warsaw, Poland

B.A. (Honours) Visual Arts – Animation & Visual Effects | 08/2020 – 08/2023

- Creative Multimedia College of Fine Arts, Hyderabad, India (Affiliated with Jawaharlal Nehru Architecture and Fine Arts University)

Pixellence Awards 2023 — Winner

- Category: 3D Character Modeling

SKILLS

Game & Level Design

- Level Blockout & world building
- Technical System Design & Scripting
- Clear communication

Software

- Unreal Engine5, Unity, Maya, Zbrush, Substance Painter
- Adobe Photoshop, After Effects,
- Perforce, Github, Jira, Miro

Language

- English
- Hindi
- Telugu
